

PRODUCT CERTIFICATION

Certified products are a top concern in today's marketplace. As a Japanese Registered Overseas Certifying Body (ROCB) and ISO/IEC 17065-accredited Product Certification agency, BMH offers one of the most extensive set of product certification programs available to the wood products industry. National building code groups, industry and foreign trade groups, and government agencies all recognize the BMH certification grademark, which is backed by our reputation as one of the world's most experienced third-party inspection and test agencies. Product certification programs available to BMH clients include, but are not limited to:

- CARB ATCM 93120
- Japanese Agricultural Standard (JAS) for plywood
- Structural plywood certifications including US Department of Commerce PS1-09 and PS2-10
- Composite Wood Product standards applicable to hardwood plywood, OSB, structural panels, particleboard, medium density fiberboard, hardboard, and others
- ANSI Standards for Hardwood Plywood and Engineered Flooring
